

The self-contained Dental Treatment Unit P3 Master

## Unique in function, flexibility, efficiency and comfort.

The elegant completely self-sufficient and mobile dental unit P3 Master is unique worldwide in its combination of function, flexibility, efficiency and comfort. Only 3 plugs need to be connected to the power supply for commissioning. This saves dental professionals high construction costs and increases flexibility in career planning and daily practice workflow. All handpieces can be freely selected and have full performance in continuous operation, just like a fixed dental unit. The suction unit with amalgam separator surpasses most conventional dental units with its impressive suction capacity (300 l/min). The ceramic cuspidor, which is mounted on a movable arm, can be flexibly positioned under the patient's mouth. This makes rinsing the mouth easy for all patients, regardless of fitness, age or body size. The P3 Master also offers comprehensive comfort in this respect due to its quiet, oil-free operation.

The self-sufficient dental unit P3 Master.  
Unique in function, flexibility, efficiency and comfort.  
For dentists and patients.
